Day 4: Count Objects ★

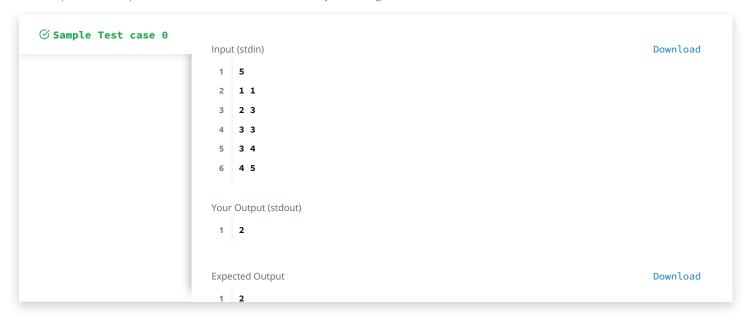

Change Theme Language: JavaScript (Node.js) The state of the state of

```
34
          objects.forEach(function(i)
 35
          {
              if(i.x==i.y)
 36
 37
                  C++
 38
          })
 39
          return c
 40
      }
 41
 42
 43
      function main() {
 44
          const n = +(readLine());
 45
          let objects = [];
 46
          for (let i = 0; i < n; i++) {
 47
              const [a, b] = readLine().split(' ');
 48
 49
              objects.push(\{x: +(a), y: +(b)\});
 50
 51
          }
 52
 53
          console.log(getCount(objects));
 54_}
                                                                                                         Line: 40 Col: 2
☐ Test against custom input
                                                                                           Run Code
                                                                                                        Submit Code
```

Congratulations!

You have passed the sample test cases. Click the submit button to run your code against all the test cases.
